PROFESSIONAL SUMMARY

Data Management student with a Bachelor's degree in Computer Science and over 15 years of experience in finance, administration, and data management. Skilled in Python, SQL, ETL pipelines, Apache Spark, Databricks, MongoDB, Neo4j, and data modelling. Strong background in transaction processing, reporting, and process optimization. Seeking roles in Data Engineering, Data Analysis, Data Science, or Data Management.

CORE SKILLS

C, C++, C#, Python, SQL, Apache Spark, Databricks, ETL Pipelines, Data Cleaning, Data

Modelling, Pandas, NumPy, MongoDB, Neo4j, Cypher, PostgreSQL, SQLite, Docker, GitHub, Jupyter Notebook, Data Visualization, Excel, Shell Scripting, HTML, CSS, JavaScript.

PROJECTS

Wedding Invitation App — Full-Stack Development

Developed and deployed a responsive, multilingual wedding invitation app with digital RSVP. Built a Next.js API for server-side validation, Cloudflare Turnstile protection, duplicate submission checks, and storage of guest responses in Supabase (PostgreSQL), using row-level security (RLS) and protected environment variables. Technologies: Next.js, React, TypeScript, Supabase, PostgreSQL, Cloudflare Turnstile, Vercel, GitHub. invitation-app-kappa.vercel.app

Student Mental Health Analytics – Individual Statistical Analysis Project

Independently conducted a statistical analysis of a dataset containing approximately

27,900 university student survey responses. Imported and transformed data into SQLite, performed data cleaning and feature engineering, and investigated relationships between depression, sleep duration, academic pressure, workload, dietary habits, and financial stress. Applied descriptive statistics, correlation analysis, chi-square tests, partial correlation, and hypothesis testing. Developed interactive visualizations and dashboards to communicate findings and support data-driven conclusions. Tech: SQL, SQLite, JavaScript, Google Charts, Statistical Analysis, Data Visualization, Git.

Sweden's Changing Political Landscape (2018–2022) – Group Data Analysis Project Collaborated in a team to analyse changes in voting patterns across Swedish municipalities between the 2018 and 2022 parliamentary elections. Integrated election results with demographic and socioeconomic data to investigate the influence of factors such as income, age distribution, unemployment, and geography on political shifts. Performed statistical analysis, data visualization, and exploratory data analysis to identify trends and present findings through an interactive web-based presentation. Tech: SQL, JavaScript, Google Charts, Data Analysis, Statistics, Data Visualization, Git.

Nordtech ETL Pipeline – Data Engineering Project Developed a modular ETL pipeline (Extract, Transform, Sentiment, Load) using Python. Cleaned and standardized e-commerce data applied multilingual BERT sentiment analysis, and loaded results into SQLite. Created KPI visualizations for revenue, regions, categories, sentiment, and delivery times. Tech: Python, pandas, numpy, transformers (BERT), SQLite, Jupyter.

Beauty Lakehouse – Multi-Model Data Architecture Built a complete data pipeline using

Apache Spark, Databricks, Delta Lake, MongoDB, and Neo4j. Modelled four curated Delta tables (customers, products, orders, order items). Embedded order items as an array inside orders in MongoDB. Created fact sales, KPI analysis, and a Neo4j graph with PLACED, CONTAINS, and PURCHASED relationships.

AI-Driven Medical Demo Website – Johannes Gutenberg University Mainz Developed a responsive demo website showcasing an AI-powered diagnostic tool for reconstructive surgery. Implemented frontend with HTML, CSS, JavaScript and backend logic with Python.

Used Docker and shell scripts for a portable development environment. Visualized AI integration of 3D scanning, thermal imaging, and Doppler ultrasound.

PROFESSIONAL EXPERIENCE

RT Bank – Erbil, Iraq Mastercard Accounting and Settlement Specialist | 2017–2023 Processed and reconciled Mastercard transactions, analysed discrepancies, automated workflows, and improved data processes in collaboration with IT.

INSO – International NGO Safety Organization – Erbil, Iraq Country Administration and Finance Manager | 2014–2015 Managed financial operations, budgeting, reporting, procurement, and administrative workflows.

VSC Security Solution – Erbil, Iraq Accounts Manager | 2012–2014 Handled accounting data, financial reports, payroll support, and bank reconciliation.

EDUCATION

TUC Yrkeshögskola – Stockholm Data Management Program | 2025–2027

Jensen Education – Stockholm Diplomat of Programming | 2024–2025

University of Al-Mansour – Baghdad Bachelor of Science in Computer Science | 1997–2001

LANGUAGES

English (Advanced), Swedish (Intermediate), Arabic (Native), Chaldean (Native)
